

Primary Care Policy

Please read thoroughly before signing.

The following guidelines regard communication between VCA Hollywood Animal Hospital and your primary care veterinarian.

Welcome to our hospital!

We respect your existing Patient-Veterinarian relationship.

As a patient of General Veterinary Practitioner, we promise to update your veterinarian on the services provided to your pet and send a complete medical history upon completion of his/her care.

As an emergency and specialty practice, we rely on the strong relationships we have with our area veterinarians. **As a result, we are unable to provide your pet with routine/wellness veterinary services such as vaccines, which your primary veterinarian can provide, for up to one year from your visit to our hospital.**

We believe it is important to maintain communication with your primary care veterinarian. The information we are able to provide is critical for continuity of care and completeness of your pet's medical history. This correspondence may include but is not limited to medical records, lab results, diagnosis and treatment recommendations.

Primary Care Veterinarian: _____

Please provide us with any additional information regarding your pet's healthcare team.
