

VCA Pet CancerCare™

In partnership with Varian, VCA is bringing Halcyon™ technology to veterinary care, with plans for adding more units in VCA Pet CancerCare™ Centers across North America.

THE FUTURE OF RADIATION THERAPY

The VCA Pet CancerCare Center at VCA Advanced Veterinary Care Center now offers Halcyon, the newest development in 3D radiation therapy technology—providing your cancer patients with the enhanced effectiveness of higher dose delivery with fewer side effects.

hope unleashed™

The Halcyon 3D Radiotherapy System

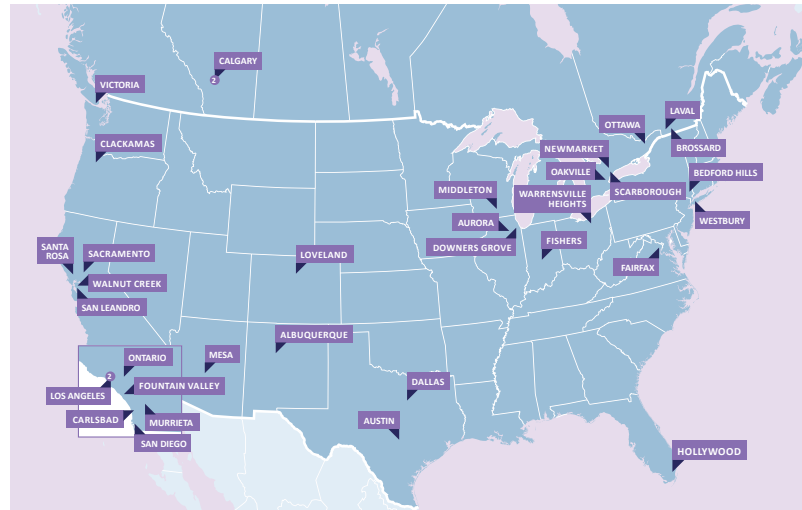

With unparalleled precision and speed, Halcyon can target even the most complex lesions, delivering powerful radiation faster with minimal damage to surrounding tissue, in less time, with fewer sessions (sometimes only one) and thus less anesthesia in most cases.

Precision

- Halcyon's innovative collimator is interdigitated and dual layered, allowing for intricate 3D beam shaping with a 5 mm resolution and an unprecedented 0.01% leakage of radiation to non-target tissues.
- Treatment is 100% image guided with a 3D CT that has a large field of view and excellent soft tissue definition, enabling precise intensity-modulated radiation therapy (IMRT).

Speed

- Halcyon features a gantry rotation speed that is four times faster than other radiation systems.
- Faster speeds enable more complex targets to be treated in the same time as typical treatments, reducing the impact of anesthesia.
- Ultrafast imaging reduces the effect of motion created by breathing.

VCA Pet CancerCare Centers

Over 35 VCA Pet CancerCare Centers are unleashing the power of collaboration to raise the bar on cancer care. Through the efforts of our integrated network of more than 600 VCA board certified specialists—including 65 board certified oncologists and 10 oncology residents—we are joining forces with primary care veterinarians to help pets with cancer live the best and longest lives possible.

VCA Pet CancerCare

*We are proud to bring the future of radiation therapy to your practice and your patients. Our VCA Pet CancerCare team is looking forward to working closely with you to bring more options, more expertise and more hope to pet owners in our community. Call us at **317-578-4100** to arrange to meet our radiation oncologist and discuss any case or referral.*
