## Appointment Checklist

Date: \_\_\_\_\_

Time: \_\_\_\_\_

- Bring in a fresh **stool sample** if your pet has not had a sample checked within the previous year or has diarrhea.
- If your pet has been vaccinated elsewhere, bring the medical records so we can update our records.
- Bring in a **urine sample** if your pet has bloody urine, is straining to urinate, or is drinking or urinating excessively. If you are unable to collect a urine sample at home, leave your pet in the car when you arrive and we will send out a staff member to help collect the sample.
- If your pet is on any **medications**, bring the name, strength and dose or the medication itself.
- Bring the brand name of food you are currently feeding your pet, along with the measured amount given for each meal.
- If the patient is being brought in for a second opinion, bring previous **medical records, X-Rays, and laboratory test results**, to provide the doctor with as much information as possible.
